

QWidget

```
classDiagram
    class QWidget
    class WidgetHelp {
        +WidgetHelp()
        +~WidgetHelp()
    }
    QWidget <|-- WidgetHelp
```

The diagram illustrates a class hierarchy. At the top is the 'QWidget' class, represented by a white box with a black border. It has two empty rectangular compartments below its name. Below 'QWidget' is the 'WidgetHelp' class, represented by a gray box with a black border. It also has two compartments: the top one contains the class name 'WidgetHelp', and the bottom one contains the public methods '+ WidgetHelp()' and '+ ~WidgetHelp()'. A blue arrow with an open triangular head points from the 'WidgetHelp' class up to the 'QWidget' class, indicating that 'WidgetHelp' inherits from 'QWidget'.

WidgetHelp

+ WidgetHelp()  
+ ~WidgetHelp()
